

Introduction

Precision Laptop Locker provides a secure classroom storage facility for students laptops, notebooks, and tablets. These lockers are designed for ease of access and provide the ability to charge the device whilst in the storage unit. The single door unit is ideal for use with younger children, allowing the teacher control of the locker, whilst the multi door unit caters for the older, independent student.

Features

- Safe, secure, scratch resistant powder coated steel construction
- Concealed hinges for additional security
- Riveted steel shelves
- Fully lockable
- Multi door units are fitted with camlocks (master key available)
- Single door units are fitted with a flushlock handle plus top and bottom lock bars to provide a 3 point locking system
- Latch locks and digital locks are also available for the multi door units (master code also available)
- Can be banked in multiple units
- Charger cable holes and ventilation slots are standard in the back panel of each compartment
- Charger cable hole is fitted with a rubber grommet (15mm diameter opening) to protect cable from damage
- Available in two heights
- Finishing dress panels to conceal fixings
- Removable shelf mounted cable clips for charger cord (optional)
