

Introduction

Apparel Lockers have been designed for the storage, distribution and collection of corporate apparel. The locker allows for hanging garments or folded garments, and includes 6, 8 and 16 door options in a single unit. Items or uniforms can be loaded into the lockers in mass using the optional master door with master key. There are two standard soiled apparel lockers. They assist with the easy collection and return of used items for cleaning. Lockers can be banked together to provide clean lines and streamlined appearance.
